Zadković K., Ivković S., Žigmundić Franjin V,, Valentić N. – IMC PRIORA

12:40 – 12:50
Endoskopski zahvati u kardijalnoj kirurgiji
Đipalo D., Horvat I., Španić J. S. – KBC Zagreb

12:50 – 13:00 – RASPRAVA

13:00 – 14:00 – PAUZA ZA RUČAK

28. SIMPOZIJ KIRURŠKOG DRUŠTVA MEDICINSKIH SESTARA

PROGRAM

PETAK, 09.10.2026.

EDUKACIJA, PROFESIONALNI RAZVOJ I SIGURNOST U SESTRINSTVU

Moderatori: Mehičić A., Batrnek J., Matekalo Ž.

14:00 – 14:10
Napredak i inovacije na Zavodu za urologiju KBCO u skladu sa svjetskim smjernicama
Barić I., Lolić M. – KBC Osijek

14:10 – 14:20
Inovacije i izvrsnost u minimalno invazivnoj kirurgiji – sestrinska perspektiva:
AOBIFF vs. EVAR
Babić K., Zagvozda L. – KBC Osijek

14:20 – 14:30
Kirurške sestre kao pokretači kvalitete i sigurnosti u endoskopskoj kirurgiji - Endoskopska kirurgija u svezi s torakalnom kirurgijom SKB-a Mostar
Ćuže D, Peko A. - SKB Mostar

14:30 – 14:40
Kirurški stacionar budućnosti – nove tehnologije, nova stručna znanja i vještine medicinskih sestara
Matekalo Ž., Kapetanović T., Stojković S. – IMC PRIORA

14:40 – 14:50
Endoskopska kirurgija danas i sutra – izazovi i prilike za medicinske sestre u edukaciji učenika srednje medicinske škole
Šestak M., Grgurević I. – Škola za medicinske sestre Vinogradska

14:50 – 15:00
Zadovoljstvo rada medicinskih sestara instrumentarki u laparoskopskoj i endoskopskoj kirurgiji
Bocka D., Zagvozda L., Mikloš I. – KBC Osijek

15:00 – 15:10
Od kontrolne liste do kulture sigurnosti: evolucija koncepta sigurnosti bolesnika u kirurgiji
Vujanić J., Lovrić R., Mudri Ž. - Sveučilište J.J. Strossmayera, Fakultet za dentalnu medicinu i zdravstvo

15:10-15:20
Organizacijska kultura u multidisciplinarnom timu operacijske sale i njezin utjecaj na zadržavanje novozaposlenih zdravstvenih djelatnika
Mehičić A., Đureković A., Batrnek J. – KBC Osijek

15:20 – 15:30
Utjecaj stresa na profesionalno sagorijevanje medicinskih sestara/tehničara na Klinici za kirurgiju KBC Osijek
Kavicki D., Vnučec M., Vukadin I.– KBC Osijek

15:30 – 15:40
Stavovi medicinskih sestara/tehničara o sigurnosnoj klimi u operacijskoj sali
Mihaljević L., Troha B. – KBC Osijek

15:40 – 15:50 – RASPRAVA

DUALTO™ Energy System

Fact sheet

Meet the next chapter of surgical energy delivery. The DUALTO™ Energy System combines multiple energy modalities into a single system that is simple to use across procedures, configurable to different care settings, and is easily upgradable.[1,2]*

A new level of operating room efficiency for enhanced patient care:

- **Space efficiency:** Configurable and customizable for different OR needs
- **Setup efficiency:** Touchscreen setup with step-by-step guidance
- **Intra-operative efficiency:** Actionable feedback for faster troubleshooting and designed for simultaneous energy delivery by multiple surgeons

9% HARMONIC™ 1100 demonstrates up to 9% faster transection speeds when used with the DUALTO™ Energy System.[3‡]

18% HARMONIC™ 700 when used on the DUALTO™ Energy System transected thick tissue up to 18% faster than on GEN11.[4†]

25% HARMONIC™ FOCUS™+ demonstrated up to 25% faster transection speeds when used with the DUALTO™ Energy System.[4±]

HARMONIC™ FOCUS+ when used on the DUALTO™ Energy System transected thick tissue significantly faster than on GEN11.[4±]

*In a summative usability study, with surgeons (n=33) that went through an end-to-end procedure and afterward responded to a series of statements regarding the DUALTO™ Energy System
‡In a R&D study evaluating performance improvements of the HARMONIC 1100 instrument family on the DUALTO™ Energy System compared to the GEN11 Generator on saline-soaked chamois as a model of thick porcine mesentery ($p < 0.001$). Based on pre-clinical testing on animal models and clinical effect is unknown
†In a R&D study evaluating performance improvements of the HARMONIC™ 700 instrument family on the DUALTO™ Energy System compared to the GEN11 Generator on thick porcine mesentery ($p < 0.05$). Based on pre-clinical testing on animal models and clinical effect is unknown
±In a R&D study evaluating performance improvements of the Harmonic™ Focus™+ instrument family on the DUALTO™ Energy System compared to the GEN11 Generator on a thick tissue model ($p < 0.05$), with 30 comparison transections. Based on benchtop testing and clinical effect is unknown

Open stapling. Revolutionized.

GIA™ stapler with Tri-Staple™ technology

The only open linear stapler available with the confidence of Tri-Staple™ technology

Advancing open stapling with greater leak protection[1,†,‡]

Strength

Compared to a two-row linear stapler, the GIA™ stapler with Tri-Staple™ technology provides stronger staple line leak pressure.[2,3,§]

Confidence

To optimize performance in thick-tissue applications, the GIA™ stapler with Tri-Staple™ technology offers:

- A new knife blade with every firing[4]
- Less retraction force than staplers with DST Series™ technology[4,§,¤]

Flexibility

The GIA™ stapler with Tri-Staple™ technology can be used with interchangeable cartridges to accommodate a broad range of tissue applications.[4]

Ordering information

	Description	Purple (medium/thick)	Black (extra thick)
60 mm	Stapler	GIA60MTS	GIA60XTS
	Cartridge	GIA60MTC	GIA60XTC
80 mm	Stapler	GIA80MTS	GIA80XTS
	Cartridge	GIA80MTC	GIA80XTC

Less stress

On tissue during compression and clamping[5,†,††]

Greater perfusion

May be allowed into the staple line[5,6,‡‡,§§]

Consistent performance

Over a broad range of tissue thicknesses[2,‡‡,¤¤]

†Bench test results may not necessarily be indicative of clinical performance. ‡Based on burst pressure testing in porcine colon comparing GIA80MTS (n = 12) and GIA80XTS (n = 12), Ethicon™ TLC75 (n = 24; p=0.010), Frankenman™ LC80B™ (n = 24; p = 0.000), and Panther™ SSAB-80 (n = 24; p=0.000). §Compared to GIA™ staplers with DST Series™ technology. Q12 out of 12 surgeons surveyed. ††Finite element analysis (FEA) was used to determine the strain profiles of Covidien and Ethicon open linear staplers during clamp-up. The GIA™ stapling with Tri-Staple™ technology demonstrated a graduated compression profile upon clamping. ‡‡Preclinical results may not correlate with clinical performance in humans. §§Based on perfusion analysis of Endo GIA™ staplers with Tri-Staple™ technology's graduated-height staple lines vs. Ethicon Echelon™ two-row, single-height staple lines (EGIA n =12, Ethicon n = 14; p = .011). ¤¤Based on an in vivo evaluation of tissue abrasion (n = 5), hemostasis (n = 5), and staple formation (n = 38) in canine models. 1.
